

# Tablet Solutions

**Tablet Computing & Tablet Solutions are taking the world by storm, with ease of use, flexibility & convergence providing a foundation for business adopting enterprise applications for total enterprise mobility.**

- Ideal for data capture & business specific electronic forms, using larger real estate
- Access information from electronic forms & data in real time + export options
- Use devices for Sales Force Automation to provide a captive Sales platform
- Enable field personnel access to customer information at point of transaction
- Signature capture and free-draw available on devices, plus photo capture
- Use standard business applications such as email, spreadsheets, documents and presentations in a single device to replace the computer, adopting a single platform
- Use the GPS functionality to monitor and report personnel positions and history
- Link this information to web based map data of customer / Forms / Job sites
- Use the device to enable other common programs using the feature rich functions
- Consider using the device for navigation, PTT and other embedded communications
- Embrace HTML applications across your browser network in tandem with apps
- Deploy Mobile Device management apps to control user content and access
- Monitor usage of devices using remote access and Telco Expense Management

Compatible with:

JobSync	iOS
FORMS	Android / W7 / XP
