

device repairs

Tracknology provide authorised mobile phone device repairs, diagnostics and benchmarking services for OEM handset manufacturers on either a national or globally regional basis.

As a Workforce Solutions company, our expertise allows us to maximise our resources and minimise our wastage using mobile technology, internet services and feature rich devices.

Handset Repairs

- Mobile phone and device repair, flashing and upgrading
- Factory level testing, real-world tests and owner validation
- Comprehensive reporting systems on all device / claim events

Diagnostics

- Handset testing to local telecommunications environment
- Device diagnostic, benchmarking and measurement
- Handset operational capacity validation / performance testing

Case Study

With a quarterly average of more than 93% success rate in mobile handset repairs & recovery, Tracknology has set an international benchmark for successful repairs for a rugged handset OEM.
