

gps tracking vs. advanced gpsi

Tracknology understand the importance of choice, and options, for companies who want to monitor field personnel and/or mobile assets, by providing two distinctly tracking systems.

Use our advanced tracking systems using standard GPS hardware, or mobile phone tracking, or use our world-class GPSi systems catering specifically for a wide range of GPS hardware.

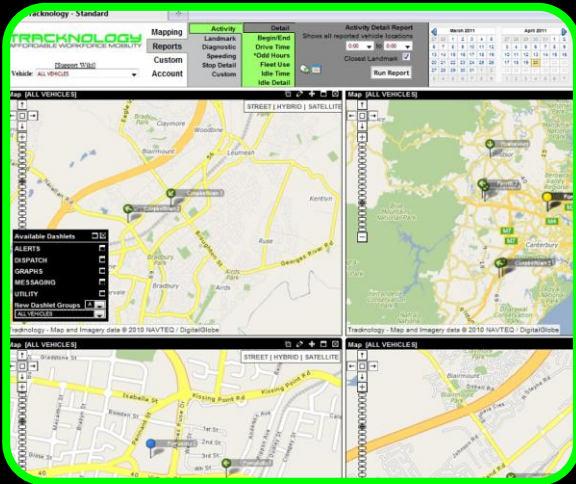

GPS Tracking from Mobile Phones - Standard GPS Platform

- GPS tracking using the GPS chipsets in your mobile phones
- Additional functionality including Time Sheet Management, GIS overlays, SOS, Duress, Proprietary Messaging, Auto-Alerts

GPS Tracking of Devices on our Standard GPS Platform

- GPS tracking using standard in-vehicle mounted GPS devices
- Competitive pricing for hardware & ongoing monthly licenses
- Substantial reporting options based on 3-minute intervals

GPS Tracking using an Advanced GPSi Reporting Platform

- Advanced reporting options with configurable automated alerts
- Configurable tracking, displays, overlays & multi-map view
- World Class GPS Tracking using wide array of GPS hardware
